Educator Guide

District 75 Schools 2023-24

Last Updated: January 15, 2025

The School Quality Reports share information about school performance, set expectations for schools, and promote school improvement. The School Quality Reports include:

- [School Quality Snapshot](#): A summary report for families and community members to learn about school performance and quality.
- [School Performance Dashboard](#): An interactive report with data visualizations for educators to investigate multiple years of school performance data. The report is publicly available for community members interested in more information.
- [Citywide Data Workbooks](#): Spreadsheets that contain detailed results for every public school in NYC.

These reports include information from multiple sources, including Quality Reviews, the NYC School Survey, and student performance.

This Educator Guide typically describes the methodology used to calculate metric values in the School Quality Reports.

School Quality Report Sections

The School Quality Reports include four categories—: School Description, Instruction and Performance, Safety and School Environment, and Relationships With Families. These new categories aim to be intuitive and aligned with New York City Public Schools' priorities.

District 75 schools do not receive scores or ratings.

School Description: information on programs, student and faculty, and the school space.

Instruction and Performance: survey questions about the instruction and learning environment and data on standardized test performance, graduation, credit accumulation, special populations, and next-level readiness.

Safety and School Environment: survey data on safety, social-emotional support, school leadership, and attendance data.

Relationships with Families: survey data on how schools engage families and school-

parent trust.

New York State School Designations

New York State implements a state accountability system that measures student performance on NYS ELA and math exams, Regents exams, and graduation rates. State accountability status does not affect the School Quality Report ratings.

Definitions

School Quality Report School Type

School Quality Reports are provided for the following school types:

School Type	Grades and Students Served
Early Childhood School	K, K-1, K-2, K-3
Elementary School	K-4, K-5, and K-6
K-8 School*	K-7, K-8, and K-12 (minus grades 9-12)
Middle School	5-8, 6-8, and 6-12 (minus grades 9-12)

High School	9-12, K-12 (minus grades K-8), and 6-12 (minus grades 6-8)
Transfer High School	9-12, focused on overage and under-credited students.

* If a new K-8 school has grade 6 but does not yet have grades 3 or 4 it will be considered a middle school until it adds one of those grades.

A school that serves grades K-12 receives two separate School Quality Reports: one for the K-8 part of the school, and one for the high school.

Similarly, a school that serves grades 6-12 receives two separate School Quality Reports: one for the middle school, and one for the high school.

This document explains the rules for the School Quality Reports for District 75 schools. [Separate Educator Guides](#) explain the rules for the other school types.

Minimum N (Number of Students)

In general, the minimum number of values used for reported calculations (for student achievement metrics) at the school level is 15. For the growth-percentile metrics, the percentage of qualifying students at the school must also be greater than 15%.

Attribution of Students to Schools

Students are attributed to schools based on the October 31, 2023, audited register. We use the enrollment from this register because it is audited for accuracy and used to allocate funds to schools.

Demographic Information

This section describes the demographics information reported in the School Quality Reports, including the School Quality Snapshot.

Student Subgroup Demographics

► *Percent of Students Enrolled in the School*

The first set of values reflect students who are enrolled on the audited register as of October 31, 2023, by racial/ethnic subgroup: Asian, Black, Hispanic or Latinx, Native American, Native Hawaiian/Pacific Islander, and White. Following NYSED reporting guidelines, any student identified as ethnically Hispanic is included only in the Hispanic category, regardless of which racial groups the student is in. Any non-Hispanic student who is identified in more than one category counts as Multiracial and is not included in the individual categories.

The next set of values reflect students who are enrolled on the audited register as of October 31, 2023, by gender: Female, Male and Neither Female nor Male. Gender is recorded on student enrollment paperwork and can be changed on request.

► **Percent of Students Enrolled in the Borough**

NYCPS students attending District 75 schools who are enrolled on the audited register as of October 31, 2023, and attend a school inside of the school's borough, by racial/ethnic subgroup.

Teacher Racial Subgroup Demographics

Any school staff member who is active and in a teacher title as of October 31, 2023, by racial subgroup: Asian, Black, Hispanic or Latinx, Native American, Native Hawaiian/Pacific Islander, and White.

A value for this metric is displayed when there are at least 5 people in a given category.

Instruction and Performance Metrics

This section describes the Performance on Assessment metrics in the School Quality Snapshot.

Growth Percentile Measures

To be included in the school's Student Progress growth percentile measures, a student must:

- Be on the school's October 31, 2023, audited register.
- Have taken the relevant exam.

► **Average Growth Percentile: NYS ELA and Math**

These metrics show the average (mean) growth percentile of a school's eligible students. A growth percentile compares a student's performance to similar students based on incoming achievement and demographic characteristics. The growth percentile reflects whether a student is exceeding or falling below the performance that would be expected based on incoming achievement and demographic characteristics.

For students in grades 4–8 who took the standard State exams, NYCPS uses student growth percentiles calculated by New York State. The details of their growth model are described in the online document, [Growth Model for Educator Evaluation 2018/19 Technical Report](#).

For students in grade 3 who took the standard State exams and for students who took ELA and Algebra Regents exams, NYCPS uses student growth percentiles calculated as part of the Advance process. For educators, a technical report describing the details of the growth model is available in the [New York City Department of Education 2017–2018 Growth Model Technical Report](#).

The School Quality Snapshot shows the average of the growth percentiles of all the students at the school.

The metric is calculated separately for ELA and math.

► **Average Growth Percentile for Students Taking Local Assessments: SANDI-FAST/WebABLLS**

This metric is similar to the average growth percentile metric described above, except it is limited to students who have received summative scores in local assessments such as the Student Annual Needs Determination Inventory (SANDI) and the web-based Assessment of Basic Language and Learning Skills (WebABLLS).

For this metric, NYCPS uses student growth percentiles calculated as part of the Advance process. For educators, a technical report describing the details of the growth model is available in the [New York City Department of Education 2017–2018 Growth Model Technical Report](#).

► **Percentage of Students at Level 1, 2, 3, and 4 in ELA and Math for Students taking the New York State Alternate Assessment (NYSAA)**

This metric shows the percentage of students who scored at Level 1, 2, 3, and 4 on the Alternate Grade-Level Indicators in ELA and math. NYSAA is a part of the New York State Testing Program. It is a datafolio-style assessment in which students with severe cognitive disabilities demonstrate their understanding of Alternate Grade-Level Indicators based on New York State learning standards.

Individualized Education Program (IEP) Services

► **Percent of Students Receiving Special Education Programs**

This metric includes all students with Individualized Education Programs (IEPs) as of June 2023, where the IEP recommends special education programs. Types of programs include Special Class (SC), Integrated Co-Teaching (ICT), and Special Education Teacher Support Services (SETSS). A student is reflected as “fully receiving” if there is an exact match between the IEP and the course enrollment in the STARS scheduling system. If the student is receiving some subjects or services but not all recommended subjects or services this is reflected as “partially receiving.” Students with no STARS data or no matching program are reflected as “not receiving.”

► **Percent of Students Receiving Recommended Related Services**

This metric includes all students with Individualized Education Programs (IEPs) as of June 2023, where the IEP recommends related services. This includes services such as speech therapy, occupational therapy, physical therapy, and counseling. If the student’s received services match all of the recommended services, the student is listed as “fully receiving.” If they have some but not all services, this is “partially receiving.” A student with a recommendation but no services is reflected as “not receiving.”

► **Movement of Students with IEPs to Less Restrictive Environments**

This represents the percentage of students at a District 75 school who, in a given school year, are integrated into a less restrictive environment within the same District 75 school or a different District 75 school. To be included in this metric, a student must:

- Be on the school’s October 31, 2022, audited register
- Be on any District 75 school’s October 31, 2023, audited register

Students contribute to the numerator of this metric if their class assignment on July 15, 2024 is less restrictive than the class assignment on July 15, 2023. Students are attributed by the October 2022 register because that school prepared the student for integration into the less restrictive environment.

Safety and School Climate

Metrics

This section describes the Safety and School Climate metrics unrelated to the New York City School Survey. The School Quality Snapshot includes a subset of those metrics.

► *Average Change in Student Attendance*

This metric shows the average change in attendance rate for the students at the school under evaluation. This measure looks at two pieces of information for each student:

- Student's attendance rate for 2022–23. (This student attendance rate is the aggregate rate from all New York City public school(s) the student attended in 2022–2023.)
- Student's attendance rate for 2023–24. (This student attendance rate includes only the rate at the school under evaluation.)

To be included in this measure a student must have an attendance rate for the 2022–23 school year with a minimum aggregate of 40 days on register at any New York City school(s) during that year. In addition, during the 2023–24 school year, the student must have been on the register of the school under evaluation for at least 40 days.

The average change in the student attendance rate for each school is calculated by taking the average of change in attendance rate from 2022–23 to 2023–24 for all students at the school under evaluation. (This metric is expressed in percentage points.)

School Quality

Metrics and Data Sources

NYC School Survey

The NYC School Survey is administered annually to students in grades 6–12, and to parents and teachers of students in all grades (3–K through 12). The survey gathers information from school communities on three School Quality Report categories.

The survey is organized as groups of questions relating to a measure, and groups of measures relating to a category.

- **Example:** The category of Instruction and Performance comprises six measures: Academic Press, Classroom Behavior, Course Clarity, Cultural Awareness and Inclusive Classroom Instruction, Quality of Student Discussion, and Strong Core Instruction. The NYC School Survey includes groups of questions related to each measure.

See [Appendix A](#) for a detailed explanation of the Measure-Category-question survey structure.

► **Question-Level Percent Positive**

For each survey question, we calculate the percentage of “positive” responses (excluding “I don’t know” or missing responses from the denominator).

Positive responses are defined as those in the favorable half of response options (i.e., out of four possible response options, the two most favorable options are treated as positive responses).

The percent positive is displayed overall for all students and for each of the following subgroups: Asian, Black, Hispanic or Latinx, Native American, Native Hawaiian/Pacific Islander, White, and English language learners.

► **Measure-Level Percent Positive**

For each measure, we calculate the percentage of positive responses. This value is the average of the percent positives of all the questions within the measure.

► **Category-Level Percent Positive**

For each category, we calculate the percentage of positive responses. This value is not simply the straight average of the percent positives of all the questions within the category. Instead, this value is the average of the measure-level percent positives for all the measures within the category. (For example, the percent positive for the Instruction and Performance category is the average of the percent positives on its six measures: Academic Press, Classroom Behavior, Course Clarity, Cultural Awareness and Inclusive Classroom Instruction, Quality of Student Discussion, and Strong Core Instruction.)

Other Metrics

► ***Percentage of Students Integrated into Non-District 75 Environment (District 75 Schools)***

This represents the percentage of students at a District 75 school who, in a given school year, are integrated or re-integrated into a non-District 75 education environment. Students contribute to the numerator of this metric if they are on the October 31, 2022, audited register of a District 75 school and are on the October 31, 2023, audited register of a non-District 75 school. The credit is attributed to the District 75 school that the student was assigned to in October 2022. The denominator for this metric includes all students on the audited register of the District 75 school in October 2022.
