

New York City Class Size 2023-24 Report (Updated)

February 2023

Background on Class Size Calculations

- New York City Public Schools (NYCPS) reports on class size twice a year with a preliminary report in November and an updated report in February. This deck reflects the updated report.
- Schools typically update their schedules through the end of the term. Historically, early data analysis includes long-term absences, incomplete scheduling data, and other characteristics that are updated by schools in the February report.
- For grades K-5, average class size is calculated by dividing the number of students as of the audited register date by the number of classes as determined by each student's official class from the Automate the Schools (ATS) system.
- For courses in grades 6-12, average class size is calculated by the number of students as of the audited register date in each course from the STARS system as determined by students who are meeting in the same place at the same time.
- **To align with the class size methodology used for the new class size law, the 2023-24 class size calculations for the City Council Report include bridge classes, non-core courses, including arts and physical education, D75 inclusion students, and shared instruction classes. Now, grades 7-8 are only represented in the STARS scheduling data; grade 6 is included in both depending on the school's scheduling method.**

Citywide Class Size Averages by School Type

Updated

To align with the class size methodology used for the new class size law, the 2023-24 class size calculations for the City Council Report include bridge classes, non-core courses, including arts and physical education, D75 inclusion students, and shared instruction classes. Now, grades 7-8 are only represented in the STARS scheduling data; grade 6 is included in both depending on the school's scheduling method.
