

Water Climate Action Day: Wednesday, May 21

Make a Splash!

Get ready for the last NYC Public Schools Climate Action Day of the school year.

During this water-themed Climate Action Day, students will learn how we can conserve water, protect our coastal ecosystems, and adapt to increased rainfall and storms in our city.

Many schools will celebrate on May 21, but they can choose any day to celebrate and plan activities. Be sure to check with your school for their chosen date.

Together, we can make a difference!

Here's How You Can Help:

1 Conserve Water

Turn off the faucet while washing hands and brushing teeth.

2 Pick Up Litter

Trash can be washed down storm drains and end up our waterways.
