DIVISION OF SCHOOL FACILITIES
OFFICE OF BUILDING SERVICES**

June 29, 2021

OFFICE OF BUILDING SERVICES CIRCULAR NO. 6 – 2020/21

NOTE: All Circulars are to be kept in a permanent file

TO ALL CUSTODIAN ENGINEERS

FY 2022 CUSTODIAL SUPPLY PROGRAM

Building allocations can be found in Galaxy and FAMIS.

In accordance with the New York State Education Law (Section 409-i) related to the procurement and use of environmentally sensitive cleaning and maintenance products in all public school buildings, custodian engineers can only procure environmentally sensitive cleaning and maintenance products for their facilities. Presently, the only exceptions to this law are floor finishes, floor strippers, and bleach. The specifics of their usage are explained in this circular.

The New York State Office of General Services (OGS) has adopted the Green Seal (GS-37) and EcoLogo certification standards for general purpose cleaners, bathroom cleaners, carpet cleaners, and glass/window/mirror cleaners. OGS has also adopted the Green Seal (GS-41) and EcoLogo (CCD-104) certifications for hand soaps. Additionally, OGS has adopted the Carpet and Rug Institute (CRI) Seal of Approval/Green Label (SOA/GL) certification for carpet vacuum cleaners. At this time, OGS continues not to adopt the Green Seal Standard (GS-40) for floor finishes and floor strippers. OGS recognizes that additional time is required to evaluate the overall effectiveness of these products. In the interim, custodian engineers are not mandated to procure environmentally sensitive floor finishes and floor strippers. However, in the spirit of utilizing safe cleaning and maintenance products in our buildings, custodian engineers are encouraged to procure floor care products that at least meet currently adopted OGS Standards.

In order for custodian engineers to remain in compliance with the green cleaning mandate, Strategic Distribution Incorporated (SDI) has included a full line of environmentally sensitive cleaning and maintenance items under this year's supply program that are either Green Seal, EcoLogo, EPA Registered and/or OGS certified. As SDI is our integrated supplier, you are to contact their customer service representatives at 888-435-7734 with any questions you may have pertaining to your procuring environmentally sensitive products.

SDI and Staples are providers from whom custodian engineers can order supplies, maintenance and toolbox items under the current Custodial Supply Program for FY 22. Under this year's program, custodian engineers will receive one combined Supply allocation, which will represent the total of both the supply and toolbox allocations for their buildings and a separate ("PPE") allocation for personal protective equipment. Refer to Circular No. 3 2020/2021, Personal Protective Equipment (PPE) Distribution Program, for specific information. Custodian engineers must continue to maintain and report a thirty-day supply of PPE products at all times.

OFFICE OF BUILDING SERVICES CIRCULAR NO. 6 – 2020/21

Additionally, custodian engineers will have the flexibility to utilize whatever percentage of their supply allocation they deem appropriate on supply and toolbox items.

The FY 22 procurement cut-off dates are as follows:

- May 13, 2022: Equipment repairs
- May 27, 2022: Non-list (aka non-cat)
- June 17, 2022: Catalog items in FAMIS

Unspent balances will not roll over to the following fiscal year.

Note that the FY22 supply allocation represents approximately two times a building's normal base amount. Some buildings will receive incremental funding for swimming pools, HVAC filters, water filters, and feminine hygiene products (FHP), less an allowance for dust mop and mat expenditures. Additionally, when allocations are entered into FAMIS, approximately 15% will be transferred to the building's equipment allocation. As a reminder, custodian engineers may transfer additional equipment funds to the supply allocation without Deputy Director of Facilities (DDF) approval. However, DDF approval is required when transferring funds from supply to equipment allocations.

Custodian engineers are to continue to procure their supplies utilizing the FAMIS procurement application, where all SDI and Staples catalog items can be found. Ordering materials through FAMIS under the FY 22 Custodial Supply Program may begin on Thursday, July 1, 2021.

As we have adopted environmentally sensitive cleaning products in our schools, the ordering restrictions of bleach and bleach-containing products are back in effect as of July 1, 2020. Custodian engineers are prohibited from utilizing bleach and bleach containing products in school buildings, except under specific applications. Bleach and bleach containing products may only be applied as a cleaner/disinfectant when addressing blood/bodily fluid spills, disease outbreaks, and specific types of cleaning/disinfecting in natatorium areas, food service areas, school-based health centers, nurses' offices, and LYFE centers. These types of applications may require special cleaning procedures that are prescribed by existing laws and regulations and are therefore not to be superseded by environmental cleaning practices. Bleach may also be utilized for mold remediation. For all other applications, substitute products for bleach are available in the SDI supply catalog. Custodian engineers are limited to procuring a maximum of six (6) gallons of bleach annually under the supply program. In order to procure additional quantities of bleach, or to procure other types of bleach products, you are required to first obtain approval from your Deputy Director of Facilities.

In addition, custodian engineers are instructed to order EPA-registered anti-viral disinfectants that have an approved emerging viral pathogen claim for COVID-19 or a disinfectant with label claims against human coronaviruses. All disinfectants are to be used according to the label instructions.

Custodian engineers responsible for a temporary care assignment are not required to expend the entire allocation during the eight (8) week assignment period. Balances will carry to each successive Temporary Care custodian engineer through the program's cut-off dates. Any information regarding orders placed for a temporary care building is to be shared with the incoming custodian engineer at the end of the temporary care assignment. This process will assist in tracking orders and will ensure that the allocation is depleted by the year's end. Copies of all orders and invoices are to be kept on file for future reference.

As our integrated supplier, SDI has relationships with numerous manufacturers and vendors that may not have their products listed within the SDI catalog in FAMIS. Custodian engineers interested in procuring MRO (maintenance, repair, and operation) items not listed, you may do so through SDI by following the FAMIS non-cat (non-list) procurement procedure.

As a reminder, all non-cat supply items for general custodial operations must meet the criteria of being environmentally sensitive or have an approved emerging viral pathogen claim for COVID-19 or OGS approved, where applicable. Additionally, all non-cat toolbox items must be for custodial maintenance or repair purposes only. Under this year's program, custodian engineers may not order capital equipment over thirty horsepower.

The Department of Education will directly reimburse SDI and Staples for all items ordered under the supply program through FAMIS, up to the established allocation threshold for each building, as indicated in Galaxy. The Division of School Facilities has advised FAMIS of each building's total supply program allocation and FAMIS will track each building's account. Custodian engineers are responsible for ensuring that they do not exceed their building's allocation.

In order to report occurrences such as late deliveries, pricing errors, shortages, etc., custodian engineers are to email their concerns to NYCCustodial@sdi.com and SDIcomplaints@schools.nyc.gov.

Custodian engineers must certify all of their SDI orders through FAMIS as items are received, following the certification of delivery procedures previously distributed. When certifying orders, be sure to indicate the "Received Date" (date materials were actually received). Do not enter the date you are certifying the order as the received date unless it is the actual date the items were received.

Custodian engineers may be called upon to provide specific information regarding a previous order under the custodial supply program. Therefore, custodian engineers are to maintain copies of all documentation associated with receipt of orders, including signed trucking tickets, packing slips, and invoices. Under the supply program, the Department of Education is billed regularly by SDI. In order to ensure that items billed were actually received, it is imperative that you maintain these documents at your building for future reference. Please do not mail these documents to the Office of Field Operations.

As a reminder, all manufacturers' warranty registration cards are to be filled out and returned to the SDI customer service center. You should also maintain copies for your records.

Please contact your Deputy Director of Facilities if you have any questions regarding this information.
