### ORGANIZATION OF JUNE BIOGRAPHIC

#### Overview

The June Biographic dataset includes student-level records of biographical information for any student enrolled in a DOE school at any point between October 31<sup>st</sup> and June 30<sup>th</sup>. The data are stored in comma separated value files (.csv) with a separate file for each school year.

In the file for each year, there is one record per student. Each student has a unique, nine-digit, non-identifiable student identification number. Although the student id numbers are non-identifiable, they are linked across years.

#### Universe of students included in dataset

There is a record for every student who had an active enrollment record at any time between the Audited Register and the last day of school. The data are from the **last active record available.** 

Note: Charter school students are not included.

### Pertinent information about NYC biographic data

A variety of data systems have been implemented over the years to capture and record student biographic data. The current system, *Automate the Schools (ATS)* was first deployed to capture high school student data in the 1999-2000 school year. Any high school data prior to that year are unreliable.

In order to comply with legal requirements, the DOE can no longer release the meal code for individual students. Instead, an indicator is provided if a student qualifies for a free lunch, a reduced lunch, or attends a universal feeding school.

## Example File Name: "2005-06\_June-Biog\_PK-12\_Scrambled.csv"

FIELD	DATA TYPE	FIELD DESCRIPTION	VALID VALUES
student_id_scram	Numeric	Non-personally identifiable student tracking number.  Note: To ensure that all student IDs are 9 digits, import the variable as test to keep leading zeroes.	Nine-digit integer.
